RE: CALFED Time Lines

Dear Lester:

It has come to my attention that some parties engaged in the CALFED process are arguing that the process is moving too rapidly and they wish the program be slowed. Let me assure you that CUWA's members do not share this view. To the contrary, we believe that CALFED must do its utmost to adhere to the schedule you have laid out and the intent to move forward with long-term solutions pledged in the Delta Accord. We must keep the momentum provided by the Accord. Maintaining a brisk pace will assure continued high-level participation in the process and keep attention focused on the critical need for long lasting solutions to Delta problems.

I hope this letter clarifies any conceptions you or others in the CALFED family may have had regarding our desires for CALFED action. If you have any concerns, please contact me.

Sincerely,

Anson B. Moran
Chair
